The plan shows a perspective view of Avenue DUGUAY TROUIN, a road that curves from the bottom left towards the top right. The road is designed with a central asphalt (grey) section, flanked by orange-paved cycle paths and dark grey sidewalks. Green spaces (bright green) are interspersed along the route, including a large area on the left and smaller patches on the right. The plan also shows property boundaries (thin grey lines), existing buildings (white outlines), and various urban infrastructure elements like streetlights, bus stops, and pedestrian crossings. A legend in the top left corner defines the symbols used for different materials and features. The scale is 1/500 and the date is 19/12/2025.
